Indu Lohith Narisetty

Security Analyst | Portfolio: Indu Lohith

Email: lohithchowdary80@gmail.com LinkedIn: linkedin.com/in/Indu Lohith Mobile: +1 (551) 339-8748 Place: United States

SUMMARY

Experienced Security Analyst with 4 years of experience specializing in cybersecurity, SIEM monitoring, incident response, and penetration testing. Proficient in threat detection, vulnerability assessment, and securing enterprise systems across cloud and on-prem environments. Achieved a 30% reduction in mean time to respond to incidents while strengthening organizational security posture. Expertise in tools including Splunk, EDR, Burp Suite, and AWS, Azure cloud platforms. Focused on optimizing security operations and maintaining compliance with NIST, OWASP, and PCI DSS standards.

TECHNICAL SKILLS

- **Programming & Scripting Languages:** Python, C, Java, Bash Scripting, PowerShell
- **Web Technologies :** HTML, CSS, JavaScript
- **Cloud Platforms:** Amazon Web Services (AWS), Microsoft Azure
- **Application Security Tools:** Burp Suite, Fortify on Demand, Sonatype
- **Penetration Testing & Vulnerability Assessment:** Metasploit, Nmap, Nessus, Qualys, Nikto, ZAP, NetCat
- **SIEM & Log Management:** Splunk, QRadar
- **Network Security & Traffic Analysis:** Snort, Wireshark, Firewalls, Intrusion Detection System (IDS), Intrusion Prevention System (IPS)
- **Digital Forensics:** Volatility, Autopsy
- **DevSecOps & Secure SDLC:** SAST, DAST, Secure Code Review
- **Security Frameworks & Standards:** NIST, OWASP Top 10, PCI DSS, MITRE ATT&CK
- **Endpoint Security:** CrowdStrike EDR
- **Databases & Data Formats:** SQL, MongoDB, JSON
- **APIs & Integration:** REST API
- **Frontend Frameworks & Libraries:** Angular Material, Bootstrap
- **Version Control & Project Management:** Git, Jira
- **Identity & Access Management (IAM):** Active Directory (AD), Multi-Factor Authentication (MFA)
- **Networking Fundamentals:** Network Protocols, Server & Client Infrastructure

PROFESSIONAL EXPERIENCE

ShineTeck Inc
Security Analyst — May 2023 – Present — College Park, MD

- Monitored enterprise SIEM and EDR systems to detect and respond to security incidents, reducing mean time to detect and respond by 30%.
- Conducted penetration testing on critical web applications and internal systems, uncovering high-severity vulnerabilities and supporting remediation efforts, improving organizational risk posture.
- Investigated complex security incidents across endpoints and networks, identifying root causes and applying mitigation strategies, enhancing detection accuracy by 20%.
- Coordinated with IT, network, and endpoint teams to remediate active threats and optimize response procedures, reducing incident resolution time and improving overall SOC efficiency.
- Implemented automated workflows for log collection, correlation, and incident reporting using Splunk, ELK, and EDR tools, streamlining security operations and increasing operational efficiency by 22%.

Intelect Design Arena Ltd
Cybersecurity Analyst — June 2021 – August 2022 — India

- Monitored security logs and alerts across enterprise systems to identify suspicious activity, supporting early detection and response to potential security incidents and reducing investigation time by 25%.
- Performed routine log reviews, access audits, and security event analysis across firewalls, servers, and applications, ensuring adherence to internal security policies and regulatory requirements.
- Resolved security incidents and service requests by analyzing alerts, documenting findings, and tracking remediation through ticketing systems, improving incident closure rates by 30%.
- Collaborated with IT operations, network, and infrastructure teams to investigate security events and implement corrective actions across many business units, strengthening overall security posture.
- Streamlined security reporting and documentation workflows by standardizing incident templates and response procedures, reducing reporting time by 20% and improving consistency across security records.

PERSONAL PROJECTS

JSecPy

- Developed a Python-based tool to detect OWASP Top 10 vulnerabilities in Java applications, leveraging static code analysis and secure coding practices, improving vulnerability detection accuracy by 40%.
- Engineered enhanced correlation search queries to identify complex security flaws, reducing false negatives during code reviews.
- Applied automated integration of JSecPy into the SDLC pipeline, streamlining security assessments across development teams and reducing manual testing effort.
- Optimized the tool for Threat-Driven Development (TTD) workflows, enabling early vulnerability identification and accelerating remediation timelines by 25%.
- Tested and validated the tool across many enterprise Java projects, ensuring reliability, recognition within the security team, and adoption as a standard assessment tool.

EDUCATION

Master of Engineering in Cybersecurity
University of Maryland, College Park, Maryland, USA — August 2022 – May 2024

Bachelor of Engineering in Computer Science Engineering
Prathyusha Engineering College, Chennai, Tamil Nadu, India — August 2018 – May 2022

CERTIFICATIONS

- CompTIA Cybersecurity Analyst (CySA+).
- CompTIA Security+ (SY0-601).
- Cisco Certified Network Associate (CCNA).
- AWS Certified Solutions Architect – Associate (SAA-C03).
- Microsoft Certified: Azure Security Engineer Associate (AZ-500).
- Certified Information Systems Security Professional (CISSP).
